

# Hotwells & District Allotments Association Ltd

## Huts, Greenhouses and Polytunnels

Permission must be obtained before the erection of any structure on allotment gardens in order to comply with the Ground Lease from Bristol City Council.

Structures must be appropriate for an allotment garden and for the plot size, and maintained in a neat and good condition. They should be sectional and easily disassembled for removal so that the site can quickly be restored as cultivable ground. They should be placed on removable foundations such as pre-cast concrete paving or blocks or railway sleepers. **It is mandatory that a method of collecting rainwater from the structure should be provided.**

Please liaise with neighbours and the Site Rep before making an application.

Name: \_\_\_\_\_

Address: \_\_\_\_\_

\_\_\_\_\_

Post Code: \_\_\_\_\_

Plot Number: \_\_\_\_\_ Site: \_\_\_\_\_

Please draw a plan showing dimensions and the proposed position on the plot with a brief description including materials. Also provide a description/diagram of how rainwater will be collected from the structure – use the back of the form if necessary.

When completed, please pass this form to your Site Rep. You will be informed by the secretary of the committee's decision in due course.
